

## Extended Suite.

Large studies  
require solutions that go  
above and beyond.

Designed for larger studies, **Extended Suite** includes everything in the Full Suite plus fully integrated medical image capture and additional safety protocols.

A complete solution

Extended Suite comes with every major Catchtrial module: Light CRF, Data Validator, Report Builder, Core Lab Images, and Safety Adjudicator.

Fully integrated image capture

Core Lab Images is a fully integrated medical image capture solution that allows rapid, secure transfer from clinical site to core lab.

Online adjudication

Safety Adjudicator puts all the necessary information for online adjudication at your fingertips, so you can accelerate the delivery of primary or secondary endpoints.
